

**Venlo, 22 September 2009**

## **PRESS RELEASE**

### **Scheuten Solar acquires a 21 MWp project funnel from Econcern**

Scheuten Solar bought two PV projects located in Italy with a total of 21 MW. Scheuten Solar acquired these projects from Econcern, which was declared bankrupt in June this year. Both projects are located in Italy in the Apulia region consisting of 13 different sites with a potential of total installed capacity of 21 MWp.

Scheuten Solar is currently extending its project development activities and the two projects will become part of the growing project portfolio Scheuten Solar has built up over the last few years.

Scheuten Solar is evaluating new partnerships with PV project developers in order to further extend its amount of projects under development whilst assisting customers with bringing their project to financial close.

- END -

***Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1600 and achieved a turnover of 467 million euro in 2008.***

***Scheuten Solar is a global player in designing, manufacturing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.***
