Scheuten Solar introduces Multisol® Integra Module

During the Intersolar 2010 from 9 until 11 June, Scheuten Solar will present their new Multisol® Integra Module.

Scheuten Solar is constantly seeking for smart PV-solutions alongside their standard high performance solar modules. Thanks to over ten years of experience in the solar market Scheuten Solar is proud to present Multisol® Integra; an integrated PV-solution suited for almost any sloped roof. This PV in-roof installation system replaces the conventional tile covering; whether as a part of the roof or as covering of the entire roof.

This new solution seamlessly fits into contemporary market demands which ask for relatively small and flexible integration of PV modules. Multisol® Integra will be first introduced in France, where the system qualifies for the feed-in tariff available for building integrated PV solutions. Together with the guaranteed power output and high reliability of the components Multisol® Integra is cost-effective and represents a solid investment for the future.

Multisol® Integra is based on the Solrif™ system by Ernst Schweizer AG consisting of an aluminum construction designed for simple and fast installation. Since the market launch of the Solrif™ system in 1999, it has been used extensively in a variety of installations in tens of MWp. The success is based on high quality Swiss craftsmanship together with numerous years of experience and versatile applicability. Combined with the German made Multisol® P6-54L, Multisol® Integra stands for an integrated system with proven quality and high power output.

“This introduction again shows the flexibility of Scheuten Solar to quickly adjust our solutions to market demands. We are able to offer our customers a solution for every application they can think of”, stated Evert Vlaswinkel, Chief Commercial Officer of Scheuten Solar.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1800 and achieved a turnover of 407 million euro in 2009.

Scheuten Solar is a global player in designing, manufacturing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.
